

Day 1: Vessel Movement & Light Well Intervention

10.00am GMT - Panel Discussion: Rig or Riserless in Sub-Saharan Africa? One Year On

- Discuss how the market has changed over the last year, reviewing any developments towards implementing riserless intervention campaigns into Sub-Saharan Africa
- Address any outstanding knowledge gaps regarding the comparison between rig and riserless intervention to understand which holds the most value for the region
- Analyse the global perspective on rig Vs riserless intervention and how this supports operational decisions being implemented in Sub-Saharan Africa

Feyi Okungbowa, *Executive Director*, **Baker Hughes**

Matthew Vick, *Senior Subsea Wells Engineer*, **BP**

Sola Adekunle, *Contractor*, **Cranium Engineering**

11.00am GMT - Presentation: LWI Vessel for Production Enhancement

- Examine examples of innovative LWI vessel based solutions for complex well integrity issues and production enhancement purposes that improve the efficiency of your well intervention projects
- Review multi-service campaigns completed on an integrated vessel and how this can solve a variety of challenges operators face when embarking on intervention projects
- Discuss how collaboration with an international and multi-disciplinary team has led to seamless operational efficiency

Neil Greig, *Sales Manager*, **Helix**

Day 2: Technology & Equipment

10.00am GMT - Panel Discussion: Deepwater Well Intervention in West Africa

- Understand how to navigate current regulations and standards to increase the volume of well intervention in West Africa
- Discuss the unique risks associated with deepwater and subsea well intervention including environmental and economic factors, from the perspective of RLWI and riser based activities
- Discover trail blazing technology, tools and services that have been used in region (or in a comparable deepwater environment) to gain the knowledge to enhance your future deepwater well intervention campaigns

Oladapo Ajayi, *Nigeria and West Africa Division Geounit Manager – Reservoir performance*, **Schlumberger**

Chiwuike Amaechi, *Principal Subsea Intervention Engineer*, **Shell**

Andrea Sbordone, *Business Development Manager*, **TIOS**

11.00am GMT – Presentation: Digital Intelligent Artificial Lift Technology (DIAL) reduces Operational Expenditure and Improves Production of Gas Lifted Wells

- Hear an overview of the DIAL production optimisation system that integrates in-well monitoring and provides control of gas lift well performance, to understand how it continually optimizes gas lifted fields remotely and without intervention
- Access a full introduction to the technology and its applicability with a focus on the benefits of its surface analytics and automation capabilities
- Discover case histories of when the DIAL technology has been used to understand the lessons learnt and benefits observed from previous installations

Abdel BenAmara, *Regional Vice President MENA & APAC*, **Silverwell**

11.30am GMT – Presentation: Blue Spark Energy Presentation

Todd Parker, *CEO*, **Blue Spark Energy**

Day 3: Enhancing Production in Ageing Wells

10.00am GMT – Presentation: An Innovative Approach to Wax Removal

- Analyze the conventional approach of mechanical wax cutting techniques to clean the tubing path to maximize productivity from old wells
- Learn how to customize your chemical development by using lab tested recipes to ensure the casing pump is free of wax deposits
- Hear a new innovative approach to inhibit wax production using the *Wax Inhibition Tool* and explore how the results of this process could benefit your future projects

Ejimofor Agbo, Senior Completions Engineer, **Newcross Exploration and Production**

10.30am GMT – Presentation: Sand Control. Simplified.

- Discover how enabling technology through material change allows for the extension of the application scope of a stand-alone screen
- Understand how you can reduce costs through proven performance examples
- Access case studies on 3M ceramic sand screens by using a rigless approach to unlock production potential from the existing assets

Bhargava Ram Gundemoni, *Global Key Accounts Specialist*, **3M**
